JUSTIFICATION:

Hunt managers set a harvest quota of 5 males or 1 female for the Upper Katlian hunt zone of mountain goat hunt RG150 on Baranof Island. Quotas are based on the most recent aerial surveys. In 2011, hunt managers devised the strategy of closing hunt zones when one female goat was harvested. This “one and done” strategy has been very effective in reducing female harvest. Keeping hunters focused on avoiding female harvest maintains opportunities for more hunters to participate, especially in hunt zones that have good access.

To date, one female goat has been harvested in the Upper Katlian hunt zone of RG150. The quota has been met and no further harvest is warranted. Therefore, this zone is being closed by emergency order.
