Philip W. Mooney
Sitka Area Wildlife Management Biologist

JUSTIFICATION:

Biologists have set a maximum guideline harvest objective of 6 males or 1 female goat allowed for that portion of Unit 4 (RG150) including that portion of the Redoubt Bay –Necker Bay Zone (all drainages west of Silver Bay to Redoubt Bay, Redoubt Lake drainage, all drainages into Crawfish Inlet, and all drainages into Necker Bay) on Baranof Island. As of Tuesday, September 27, 2011, three female goats have been reported harvested. Because the guideline harvest has been met in this area, an emergency order is being issued to close the mountain goat hunting season at 11:59 pm, Thursday, September 29, 2011. The emergency order action is necessary to restrict the harvest to the guideline level, and to prevent overharvest in this area. Any additional harvest could have long-term negative effects on this goat population.
