Commissioner

By delegation to: 
Thomas Schumacher
Region 1 Fish & Game Coordinator

JUSTIFICATION:

Hunt managers set a harvest quota of 2 males or 1 female for the Rosenberg Lake hunt zone of mountain goat hunt RG150 on Baranof Island. Quotas are based on the most recent aerial surveys. In 2011, hunt managers devised the strategy of closing hunt zones when one female goat was harvested. This strategy has been very effective in reducing female harvest. This “one and done” policy not only reduces female harvest in areas where there may be population concerns, but helps maintain high harvest opportunities for male goats. Keeping hunters focused on avoiding female harvest maintains opportunities for more hunters to participate, especially in hunt zones that have good access.

To date, two female goats have been harvested in the Rosenberg Lake zone of RG150. Therefore, this zone is being closed by emergency order.
