JUSTIFICATION:

A guideline harvest objective of 1-2 points (male goats = 1point, female goats = 2point) was established for the area described above. As of Tuesday, November 2, 2021, two male goats have been harvested for a total of 2 points. Due to the vulnerability of goats in this area and because the guideline harvest level has been met, an emergency order has been issued. Those portions of Unit 1D not affected by this emergency order, and not previously closed by emergency order, will remain open until the harvest guidelines are reached or the seasons come to their scheduled conclusions. Biologists with the Alaska Department of Fish and Game encourage hunters to target male goats to allow for higher sustainable harvest.
