By delegation to: Tim C. Peltier
Area Wildlife Biologist

JUSTIFICATION:

Annual hunting quotas for goats in 14A are based on 7% of the adult population. The 3-year average adult population for the Chugach portion of Unit 14A is 202 goats. As a result, this year's quota for harvest was 14 goat points. Under the goat point system, a billy counts as 1 point, and a nanny counts as 2 points. As of 26 October 2022, a total of 14 points have been taken (8 billies and 3 nannies.) To prevent the goat harvest quota from being exceeded, the department is closing all goat hunts in Subunit 14A. Harvest from the draw hunt permits (DG890 and DG891) totaled 7 goat points and harvest from registration hunt permits (RG890 and RG891) totaled 7 points as of 26 October 2022.
