

RESOLUTION . . - Board of Game
Request for Public Safety involvement
in enforcement of caribou regulations

WHEREAS the Western Arctic caribou herd is at a seriously low population level, and

WHEREAS the residents of the western Arctic depend on the closely controlled harvest of this herd for sustenance,

NOW THEREFORE be it resolved that the Board requests the Department of Public Safety to develop plans for surveillance and enforcement of regulations set by the Board. The Board contemplates that this would require reallocation of personnel and equipment, and travel funds should be made available.

Passed by unanimous vote September 22, 1976
