### Lures, Attractors, Bait

Buzzbaits or spinnerbaits, 1/2 - 3/8; plastic baits imitating juvenile pike, salmon, or worms; Hot Shots or Wiggle Warts; Coyote spoons; Rapala top water baits. Weedless hooks are recommended, since pike prefer aquatic vegetation.

### Other Gear

There may be areas where it is legal to use a spear to target pike, and other areas where is it open to bowfishing for pike.

Steel leaders are highly recommended, since they ensure that the pike's sharp teeth won't break the line. Pike also have teeth on their gills, so a hook removal tool would also be helpful.

## Also Helpful

Large landing net, preferably rubber, since fish flop and twist a lot; pliers or other hook removal tool; hook sharpener; nippers to trim line; knot tying guide; extra line and or leader; measuring tape or guide (some fish have length limits); fillet knife & knife sharpener; breathable waders and wading shoes, or hip boots; fish stringer. Felt-soled wading shoes are illegal in Alaskan fresh waters.

Don't forget to take a life jacket/PFD, sunblock and bug repellent, first aid kit, and regulation booklet. Remember, there may be many areas where cell phones do not work, so be sure to let someone know where you are going and when you are expected to return.
