

Informational Packet

Information Packets *ARE*:

- **Intended to help inform Working Group discussions.**
- **To be viewed and used in context with Working Group meetings only.**

Packets *ARE NOT*:

- **To be viewed as standalone documents.**
- **A final say on fisheries management decisions.**

Please use this information responsibly:

Packet information is an incomplete snapshot of an ongoing discussion and changing conditions. Packet information should not be reproduced for any purpose other than to describe Working Group meeting discussions.

Misuse of Packet information can contribute to misunderstandings that can **cause harm to salmon users** and potentially **damage salmon resources**.

Ask Questions: ADF&G staff will be happy to answer biology and management questions. Please call **1-855-933-2433** to reach ADF&G Kuskokwim Area staff.

Attend Meetings: Each Working Group meeting is announced at least 48 hours prior to time and date of meeting. In addition, each meeting is recorded. Recordings can be found here:
http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyarea_kuskokwim.kswg

Viewing the information packet while listening to meetings/recordings will provide a better understanding of the information presented in this packet.

Thank you.

LOWER KUSKOKWIM RIVER INSEASON CATCH MONITORING REPORT: Orutsararmiut Native Council (ONC)

July 18, 2016

Table 1: Fishing Reports from July 11th-15th

Families Surveyed	Families Fishing	Drift-nets	Set-nets	>6" Mesh	>4"-6" Mesh	4" or Less	Rod & Reel	Dipnet	Fish Wheel
55	1	1	0	0	1	0	0	0	0

Table 2: Did you achieve harvest goals for King salmon, sockeye salmon and/or chum salmon?

Total Family Responses	King Harvest Goals Achieved (Y)	Sockeye Harvest Goals Achieved (Y)	Chum Harvest Goals Achieved (Y)	King Harvest Goals Achieved (N)	Sockeye Harvest Goals Achieved (N)	Chum Harvest Goals Achieved (N)
45	58%	56%	58%	42%	40%	33%

Table 3: Were your harvest goals reduced due to conservation concerns?

Total Family Responses	Yes	No
45	22%	60%

Table 4: How were catch rates this year compared to catch rates last year?

CHINOOK			CHUM			SOCKEYE		
Good	Average	Poor	Good	Average	Poor	Good	Average	Poor
31%	22%	18%	4%	40%	16%	26%	27%	16%

Harvest Goal Summary:

Questions regarding Chinook salmon, chum salmon and sockeye salmon harvest goals are illustrated in Tables 1–4. More than half of the families surveyed did achieve king salmon, sockeye salmon and chum salmon harvest goals. Four families did not respond to the question addressing if chum salmon harvest goals were achieved because they were not targeting chum salmon. Two families were not targeting sockeye salmon, and therefore, did not respond to the question addressing if sockeye salmon harvest goals were achieved. Ten families did not respond to this question at all. Of those ten families, five families did not respond because they did not have a boat or were too busy. The other five families did not respond to this question because they had no set goals in mind due to regulations. These five families fished for whatever they were able to harvest with no set goal in mind.

Informational Packet

Surveyors followed up with an additional question to all 45 families inquiring if they reduced their harvest goals due to conservation concerns. As shown in Table 3, the majority of families did not reduce their harvest goals due to conservation concerns. Eight families did not respond to this question because they did not have any set harvest goals.

Catch Rates:

Surveyors inquired how this year's catch rates compared to last year's catch rates; 55 families responded to this question. For Chinook salmon, 29% of the families did not respond to this question. For chum salmon, 40% of the families did not respond. For sockeye salmon, 31% of the families did not respond. These families did not respond because they were not targeting that particular species this season and did not target them in the past. Other families did not respond because they did not fish at all this season. Certain families were only focused on responding to how Chinook salmon catch rates varied from last season to this season and, therefore, did not respond to this question for chum salmon and sockeye salmon.

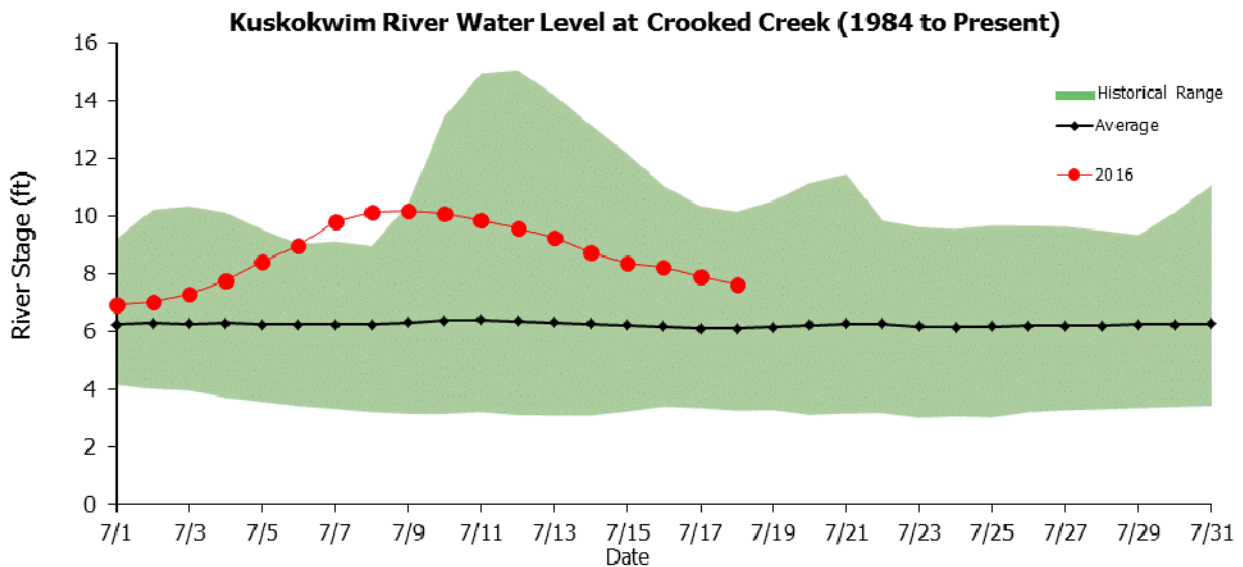

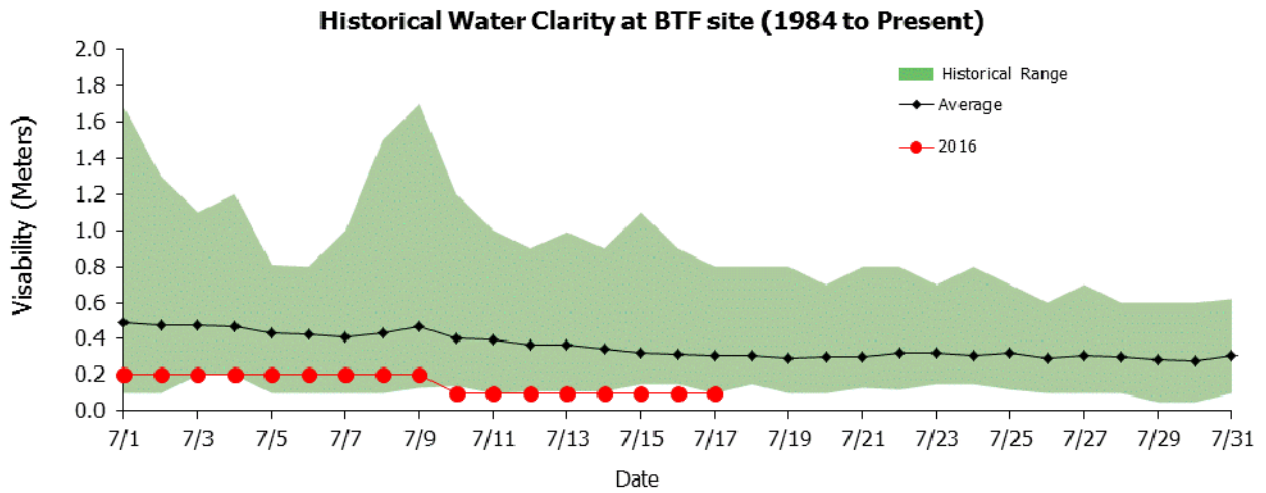

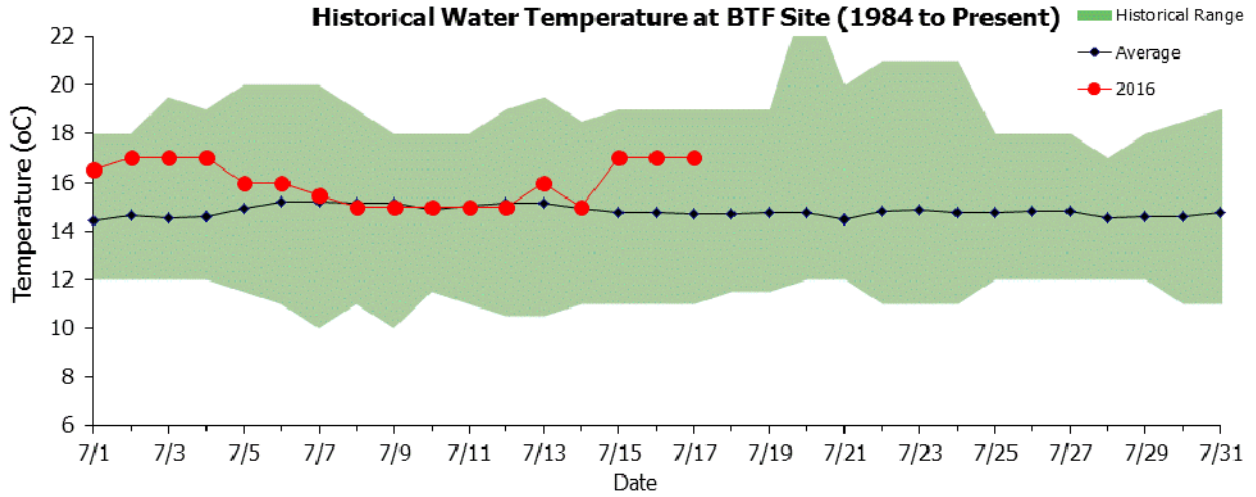

Comments:

As illustrated in Table 1, only one of the 55 families surveyed was actively fishing. Families were not fishing for a multitude of reasons including the following: no boat, limited gear, too busy, limited restrictions and no desire to "combat fish." Other families were not fishing because it was too late in the season, and complained about having to tend to their fish more than desired as a result of bugs and larvae sacs. Families that did fish were relatively happy to be out fishing and commented that the fishing was good this season. Although this may not be as heavily reflected in Table 4, families said the catch rates for Chinook salmon were much better this year than last year. Multiple families commented on low sockeye salmon abundance this year compared to last year. Certain families commented on the fish looking relatively healthy this year in comparison to last year.

Surveyor comments:

Surveyors went out to fish camps this week and also conducted phone interviews. Most families were putting away their fish for the winter when surveyors visited the fish camps. Only one family was actively fishing, while the others were at fish camps enjoying time with family and friends, not fishing. Not many boats were observed when surveyors were out on the water. Phone call surveys were conducted and gathered similar results. Most of the families were content with over-the-phone surveys, and responded to all questions answered.
