UPPER COOK INLET COMMERCIAL FISHING ANNOUNCEMENT No. 16
EMERGENCY ORDER NUMBER 2S-16-19

Upper Cook Inlet (UCI) Commercial Fishing Announcement No. 16 opens commercial salmon fishing with set gillnets in the Kenai and Kasilof sections of the Upper Subdistrict from 8:00 a.m. until 11:00 p.m. on Monday, July 22, 2019. This announcement also alters the fishing time for the East Foreland Section set gillnet fishery. This area will be open from 7:00 a.m. until 11:00 p.m. on Monday, July 22, 2019 to coincide closing with the rest of the Upper Subdistrict set gillnet fishery.

Additionally, UCI Commercial Fishing Announcement No. 16 opens drift gillnetting in Drift Gillnet Area 1 and in the Expanded Kenai and Expanded Kasilof sections of UCI on Monday, July 22, 2019, from 7:00 a.m. until 7:00 p.m.

All other set gillnet fisheries in UCI will fish the regularly scheduled period from 7:00 a.m. until 7:00 p.m. on Monday, July 22, 2019, except for setnetting in that portion of the Western Subdistrict of the Central District south of the latitude of Redoubt Point, which is open from 6:00 a.m. until 10:00 p.m. on Monday, July 22, 2019. Northern District setnetters are reminded of gear restrictions for fishing periods on July 22, 25, & 29 that were announced in UCI Commercial Fishing Announcement No. 15, issued today.

As of July 20, the Kasilof River sockeye salmon run is 65% complete based on average run timing and projects a final escapement of more than 339,000 fish. The biological escapement goal (BEG) for Kasilof River sockeye salmon is 160,000–340,000 fish. In the Kenai River, average sockeye salmon passage into the Kenai River is 39% complete through July 20. Inseason information indicates sockeye salmon run timing is late. Based on this, final passage projections of sockeye salmon in the Kenai River are expected to exceed 1.0 million fish. Fishing in the above described waters is warranted in order to harvest sockeye salmon returning to the Kenai and Kasilof rivers.

The Kenai River late-run king salmon sport fishery was restricted to fishing with no bait beginning on July 1, 2019. According to 5 AAC 21.359(e)(3)(A) Kenai River Late-Run King Salmon
Management Plan, if the use of bait is prohibited in the sport fishery, commercial fishing periods in the Upper Subdistrict set gillnet fishery, excluding the East Foreland Section, are open for no more than 48 hours per week beginning July 1, with a 36-hour continuous closure per week beginning between 7:00 p.m. Thursday and 7:00 a.m. Friday. With regularly scheduled fishing periods on Mondays and Thursdays no longer in effect in the Upper Subdistrict set gillnet fishery, except for the East Foreland Section, any and all fishing time provided to this set gillnet fishery may occur only via EO beginning July 1, 2019. With this announcement, the Upper Subdistrict set gillnet fishery south of the East Foreland Section will have fished 29 of the available 48 hours for the management week of July 21 through July 27.

As a reminder, UCI Fishing Announcement No. 4 implemented gear restrictions in the Upper Subdistrict set gillnet fishery, except for the East Foreland Section, from July 1–31, 2019, unless superseded by subsequent EO. The specific gear restrictions are identified in 5 AAC 21.359(e)(3)(A)(i), where it states that if bait is prohibited in the Kenai River king salmon sport fishery in order to achieve the SEG, then the number of set gillnets operated in the Kenai and Kasilof section set gillnet fishery may also be restricted to no more than four set gillnets that are each not more than 35 fathoms in length, 105 fathoms in aggregate length, and 29 meshes in depth, or no more than two set gillnets that are each not more than 35 fathoms in length and 45 meshes in depth. Set gillnets that are not more than 29 meshes in depth must be identified at one end of the gillnet with an attached blue buoy that is not less than nine and one-half inches in diameter. Set gillnet mesh size regulations do not change under these restrictions. These set gillnet gear restrictions will be in effect in the Kenai and Kasilof sections of the Upper Subdistrict beginning July 1, 2019.
