2020 Yukon River Salmon Summer Fishery Announcement #04

District 4 and Koyukuk River Subsistence Fishing Schedule

Districts Affected: Upper Yukon Area

The 2020 Chinook salmon run size is forecasted to be smaller than the 2019 run. The first subsistence-caught Chinook and summer chum salmon were reported on the Lower Yukon on May 27 and May 28. Early fish should be traveling through District 4 at this time. For most districts, the subsistence fishing schedule is being reduced to half the regulatory (windows) fishing schedule and gillnets will be restricted to 6-inch or smaller mesh. This is intended to limit the harvest on Chinook salmon while more information about the timing and strength of the run is collected.

As a reminder, the following gears are legal during subsistence salmon openings in District 4; set and drift gillnets, dip nets, beach seines, and fishwheels. Hook and line is legal subsistence gear in the Nulato River and downstream from the mouth of the Nulato River. During subsistence salmon fishing closures, fishing for non-salmon species is allowed; however, gillnets must have 4-inch or smaller mesh and fishwheels may not operate.
