2020 Yukon River Salmon Fall Fishery Announcement #8 **Revised: Subdistricts 5-A, 5-B, and 5-C Subsistence Fishing Schedule**

Districts Affected: Upper Yukon Area

The 2020 fall chum salmon preseason projection is for a run size of less than 450,000 fish. This level of abundance is not likely to meet escapement goals and treaty objectives. The 2016 parent year that produced this year's age-four age class has shown exceptionally poor survival in all chum salmon runs in all western Alaska. Without the age-four fish that typically dominate a fall chum salmon run, the overall return is expected to be much lower than forecasted. Subdistricts 5-A, 5-B, and 5-C are transitioning to fall season management. Consequently, the subsistence fishing schedule is reduced to limit the harvest of fall chum salmon to allow more fish to reach their spawning areas.

Subsistence Management Actions

Subdistricts 5-A, 5-B, and 5-C (Tanana and Rampart):

Subsistence salmon fishing is currently closed.

Effective 6:00 p.m. Tuesday, August 11, subsistence salmon fishing will open with 7.5-inch or smaller mesh gillnets and fish wheels on a reduced fishing schedule of two 24-hour periods per week from:

6:00 p.m. Tuesdays to 6:00 p.m. Wednesdays

6:00 p.m. Fridays to 6:00 p.m. Saturdays

During subsistence salmon fishing closures, only gillnets with 4-inch or smaller mesh may be used to target non-salmon species. Fish wheels may not be operated during the closures.

COVID-19

Under Alaska's Health Mandates 10, 17, and 18, commercial and subsistence fishing is essential and is part of Alaska's Essential Services and Critical Infrastructure. Fishermen should ensure that all travel and other activities follow protocols in Alaska COVID-19 Health Mandates. COVID-19 Health Mandates may be found here: <https://gov.alaska.gov/home/covid19-healthmandates/>.

This is an announcement by the ADF&G in cooperation with the U.S. Fish and Wildlife Service. To reach the U.S. Fish and Wildlife Service in Fairbanks call 456-0406.
