2023/24 SOUTHEAST ALASKA HERRING WINTER FOOD AND BAIT FISHERY

The 2023/24 Southeast Alaska herring winter food and bait fishery opens by regulation October 1. The Craig/Klawock area is the only winter food and bait fishery that will open for the 2023/24 season. A finalized forecast is not available at this time but based on the 2023 spawn deposition estimate the overall guideline harvest level (GHL) for the 2023/2024 season is expected to be more than adequate to allow for the winter food and bait fishery to begin October 1. A formal forecast and GHL will be available and announced by December.

Section 3-B and District 4 (Craig/Klawock): will open at 12:01 a.m., Sunday, October 1, 2023, in those waters of Section 3-B west of a line from Blanquital Point at 55°37.36' N lat, 133°23.86' W long to Point Santa Rosalia at 55°34.19' N lat, 133°24.84' W long to Point Cuerdo at 55°28.51' N lat, 133°19.00' W long to Point Miraballes at 55°25.87' N lat, 133°05.22' W long and in those waters of District 4 north and east of a line from Lontana Point at 55°12.25' N lat, 133°20.12' W long to Diver Point at 55°11.02' N lat, 133°14.36' W long with the following restriction:

Trocadero Bay: will be closed east of the longitude of the westernmost tip of Canoe Point at 133°01.48' W long.

District 7 (Ernest Sound): will be closed. Minimal herring spawn was observed, and a spawn deposition survey was not conducted in 2023. Therefore, a forecast for the 2023/24 season was not generated.

District 10 (Hobart Bay/Port Houghton): will be closed. Minimal herring spawn was observed, and a spawn deposition survey was not conducted in 2023. Therefore, a forecast for the 2023/24 season was not generated.

District 12 (Tenakee Inlet): will be closed. Minimal herring spawn was observed, and a spawn deposition survey was not conducted in 2023. Therefore, a forecast for the 2023/24 season was not generated.

Fishermen and operators of tendering vessels must obtain an ADF&G permit to participate in the winter food and bait fishery (5 AAC 27.179) prior to fishing. For the 2023/24 season, the terms of the permit stipulate: 1) the amount of herring harvested and delivery location be reported to the Ketchikan office for Section 3-B and District 4 by 12:00 noon on the day after fish were harvested; and 2) one 5-gallon bucket of herring is to be provided to the department from each delivery for sampling purposes. Permit applications are available at ADF&G area offices in Ketchikan, Sitka, Petersburg, and Douglas.

The Emergency Order corresponding to this announcement is EO 1H1023.
