Doug Vincent-Lang
Commissioner

By delegation to:

Cory Stantorf
Anchorage Assistant Area Wildlife Biologist

JUSTIFICATION:

Goat surveys conducted in the Twentymile area during the summers of 2011, 2015, and 2017 gave an estimated population of 115 goats. To ensure meeting the population objective of at least 500 goats in GMU 14C that will sustain an annual harvest of 25 goats, comprising at least 60 percent males, harvest from this area should not exceed five goat points. The Twentymile area is managed with separate registration hunts for resident and non-resident hunters. Four (4) of the total goat points are allotted for residents holding permit RG868. Total goat points are calculated using one point for billys and two points for nannies. Currently, three goat points (1 billy and 1 nanny) have been reported harvested by resident hunters, and hunters currently remain in the field; therefore, no further harvest is warranted from this hunt. RG868 will close at 11:59 pm on September 18th, 2022.
