Custom Production (processing) Done **by** You for Others

List only custom production done by you. List all processors for whom your company custom processed fish and/or shellfish. List all other operations within your company for which production occurred at the vessel/facility for which your vessel/facility did NOT write the fish ticket. For example, if you purchased fish using the processor code for a Southeast Alaska facility and then the fish was processed at a Prince William Sound facility, list the facility that wrote the fish ticket. DO NOT include any of that production information on this report. The processors or other operations that you name will file the information in their own reports.

Name of Company (For whom you processed fish)	State Processor Code (If known)	Location of Company or Vessel Name
