

**FISH HABITAT PERMIT
SMALL SCALE MINING - ANCHORAGE AREA**

I hereby make application for a Fish Habitat Permit for small scale mining in streams in the Anchorage Area as indicated in this permit.

NAME: _____

ADDRESS: _____

CITY: _____ STATE: ____ ZIP: _____

TELEPHONE: _____

E-MAIL: _____

AUTHORIZED SMALL SCALE MINING EQUIPMENT

Suction Dredge: Intake (in.): _____ (must be 6 inches or less)

Horsepower: _____ (must be 18 hp or less)

Power Sluice: Horsepower: _____ (must be 18 hp or less)

For Official Use Only

PERMIT NUMBER: FH20-II- _____

DATE ISSUED: _____

DATE EXPIRES: December 31, 2020

ISSUED BY: _____
Delegation from Doug Vincent-Lang, Commissioner,
Alaska Department of Fish & Game

“Power Sluicing” is defined as the use of a sluice box and small pump to process material delivered to the sluice with hand tools (shovels, buckets, etc.). This type of mining is also commonly referred to as “High Banking”.

I certify that I am a small scale miner and that I have read and understand this permit, including the permit conditions. I agree to strictly abide by all of the conditions of this permit and I affirm that all information provided herein is true and correct. I acknowledge that non-compliance with the conditions of this permit is subject to the penalty provisions of AS 16.05.841 and/or AS 16.05.871(d).

Signature of Applicant _____

Date _____

For Official Use Only

Authorized Small Scale Mining Areas:

Creek/River Name	AWC Number	Section	Township	Range	Meridian	Dates Permitted	Anadromous (A) Resident (R)

Supplemental stream list attached

In accordance with AS 16.05.841 and AS 16.05.871(d), approval is hereby given to mine with the specified authorized equipment at the specified locations subject to the following stipulations.

PERMIT STIPULATIONS – ANADROMOUS FISH STREAMS

These stipulations apply to anadromous water bodies specified under AS 16.05.871(a) (Catalog of Waters Important for Spawning, Rearing, or Migration of Anadromous Fish).

Stipulations for ALL Small Scale Mining in Anadromous Streams

1. Mining activities below the ordinary high water (OHW) line may be seasonally restricted to protect incubating fish eggs, alevins, and fry within the streambed gravels. Consult the *Authorized Streams Table* (Page 1) to determine timing restrictions for specific water bodies.
2. Construction or maintenance of dams, diversions, fills, deflectors, and any other structures below the OHW (vegetation) line is prohibited.
3. Natural streambanks and vegetated gravel bars or vegetated islands shall not be mined, under cut, or disturbed.
4. Motorized equipment shall not be used to move boulders, logs, or other objects too large to be moved by hand.
5. Wheeled or tracked vehicles or equipment shall not be operated in the stream or disturb the streambank.
6. No equipment leaking fuel, hydraulic fluid, or other pollutants shall be operated below the OHW line.
7. Water withdrawal is restricted to processing material through the sluice box and shall not be used for hydraulic mining or any other purpose.

Additional Stipulations for Power Sluicing in Anadromous Fish Streams

8. Water intakes must be screened with 1/8-inch mesh to prevent the impingement and entrainment of fish.
9. Adequate flow must remain to maintain fish passage during mining activities.

PERMIT STIPULATIONS – RESIDENT FISH STREAMS

These stipulations apply to resident fish streams pursuant to AS 16.05.841.

Stipulation for ALL Small Scale Mining in Resident Fish Streams

1. Construction or maintenance of dams, diversions, fills, deflectors, and any other structure that may impede the efficient passage of fish is prohibited.

Additional Stipulation for Power Sluicing in Resident Fish Streams

2. Water intakes must be screened with 1/8-inch mesh to prevent the impingement and entrainment of fish.

This permit does not allow motorized vehicle use in anadromous (salmon bearing) streams. A separate Fish Habitat Permit is required to cross anadromous waters.

This determination applies only to activities regulated by ADF&G. This determination does not relieve you of the responsibility for securing other state, federal, or local permits nor does it authorize trespass on mineral claims or private property. It is the responsibility of the applicant/permit holder to obtain lawful permission from the landowner or land management agency prior to conducting activities authorized by this permit. Please contact the Anchorage ADF&G Habitat Section office at (907) 267-2342 with any questions.

On state land, the Alaska Department of Natural Resources, Division of Mining, Land and Water (ADNR\DMLW) also classifies suction dredges with an intake 6 inches or less as recreational. Dredge operators with an intake larger than 6 inches should contact the ADNR\DMLW (907-269-8652) to obtain commercial mining application instructions.

The Alaska Department of Natural Resources, Division of Parks and Outdoor Recreation (ADNR/POR) has additional limitations on the use of motorized mining equipment within state park units. Miners should contact the ADNR/DPOR at (907) 269-8400 to obtain the latest information for those areas.

The Bureau of Land Management (BLM) has additional limitations on the use of motorized small scale mining equipment within lands managed by BLM. Please contact the Bureau of Land Management (907-271-5960) to obtain the latest information for those areas.

The U.S. National Park Service (NPS) reviews all mining activities, regardless of size, under the Mining in Parks Act. Please contact the NPS at (907) 644-3510 to obtain the latest information for those areas.

The Alaska Department of Environmental Conservation (ADEC) considers dredges with an intake 6 inches or smaller as small scale and has issued a General Permit (GP) for small scale mining in Alaska. Larger dredges are considered commercial operations and require prior notice or approval from the federal land manager and ADEC. For more information, please contact the ADEC at (907) 451-2142.

For any activity that significantly deviates from the approved plan, you shall notify the Habitat Section and obtain written approval in the form of a permit amendment before beginning the activity. Any action that increases the project's overall scope or that negates, alters, or minimizes the intent or effectiveness of any stipulation contained in this permit will be deemed a significant deviation from the approved plan. The final determination as to the significance of any deviation and the need for a permit amendment is the responsibility of the Habitat Section. Therefore, it is recommended you consult the Habitat Section immediately when a deviation from the approved plan is being considered.

For the purpose of inspecting or monitoring compliance with any condition of this permit, you shall give an authorized representative of the state free and unobstructed access, at safe and reasonable times, to the permit site. You shall furnish whatever assistance and information as the authorized representative reasonably requires for monitoring and inspection purposes.

This letter constitutes a permit issued under the authority of AS 16.05.841 and AS 16.05.871 and must be retained on site during project activities. Please be advised that this determination applies only to activities regulated by the Habitat Section; other agencies also may have jurisdiction under their respective authorities (see above). This determination does not relieve you of your responsibility to secure other permits; state, federal, or local. You are still required to comply with all other applicable laws.

In addition to the penalties provided by law, this permit may be terminated or revoked for failure to comply with its provisions or failure to comply with applicable statutes and regulations. The department reserves the right to require mitigation measures to correct disruption to fish and game created by the project and which was a direct result of the failure to comply with this permit or any applicable law.

You shall indemnify, save harmless, and defend the department, its agents, and its employees from any and all claims, actions, or liabilities for injuries or damages sustained by any person or property arising directly or indirectly from permitted activities or your performance under this permit. However, this provision has no effect if, and only if, the sole proximate cause of the injury is the department's negligence.

AS 16.05.871(anadromous stream) permit decisions may be appealed in accordance with the provisions of the Administrative Procedures Act (AS 44.62.330—44.62.630).
