Members of the Alaska Board of Fish

I testified on 2/1/2014 to the BOF. Some of my testimony was about the effects of shallow nets on the harvest of King and Red salmon.

Conservatively I can say if I used all shallow gear my King salmon harvest would be 50% less than fishing all deep nets

My sockeye harvest using shallow nets, I believe, would be 80-85% of what I would harvest in a full complement of deep nets

Thank you
