REGARDING PROPOSAL 60

Member Jefferey and the Board of Fish,

Please consider that Graveyard Creek is not more than 100' wide at highest tide. At 8 feet of water people regularly walk across it. At zero feet there is less than 1 foot of water in it.

Also please consider that the permit holders claiming to have "historically" fished in the creek always did so at considerable conflict with the other fishermen who use the creek. Basically it was not enforced by ADF&G because they just didn't make it a priority.

Furthermore, I can confidently say that the first time I remember anyone fishing in this creek was NOT BEFORE 1990. My family has fished near the mouth of the creek since 1956- as a point of reference.

please see attached aerial photo of this area with the site lease lines overlayed.

thank you

Reid Ten Kley (permit holder)
