

Substitute Language for Proposal 78

Submitted by Kenai River Sportfishing Association

Amend the ***Upper Cook Inlet Salmon Management Plan (5 AAC 21.363)*** as follows:

(a) The department should receive long-term direction in management of upper Cook Inlet salmon stocks and salmon species. Divisions within the department must receive long-term direction in order to accomplish their missions and plan management, research, administrative, and other programs. Upper Cook Inlet stakeholders should be informed of the long-term management objectives of the Board of Fisheries (board). Therefore, the board establishes the following provisions for the management and conservation of upper Cook Inlet salmon stocks:

- (1) consistent with the statutory priority for subsistence, the harvest of upper Cook Inlet salmon for customary and traditional subsistence uses will be provided for specific species in appropriate areas, seasons, and periods to satisfy subsistence needs; other beneficial uses, to the extent they are consistent with the public interest and overall benefit of the people of Alaska, will be allowed in order to maximize the benefits of these resources;
- (2) to provide for the management and allocation of the upper Cook Inlet salmon resources, the harvest of the upper Cook Inlet salmon will be governed by specific and comprehensive management plans adopted by the board for salmon stocks and species, on a Cook Inlet basin wide basis, for different areas, and drainages and for different types of fisheries;
- (3) in adopting the specific management plans described in (2) of this subsection the board will consider:
 - (A) the need for sustainable fisheries for all salmon stocks and salmon species throughout the Cook Inlet basin;
 - (B) the protection of the fisheries habitat both in the fresh water and the marine environment throughout the Cook Inlet basin; and
 - (C) the various needs and demands of the user groups of the salmon resources of upper Cook Inlet to include the importance of each fishery for providing residents the opportunity to harvest fish for personal and family consumption;
- (4) in these management plans, the board may, as appropriate, address the following considerations:
 - (A) the need to allocate the harvestable surplus among commercial, sport, guided sport and personal use fisheries; and
 - (B) the need to allocate the harvestable surplus within user groups;
