

SUPPORT FOR PROPOSAL 170

The 500 pot limit should go into effect this 2023 fishing season. North peninsula has seen a major uptick in participation as well as record harvest numbers.

If this limit does not go into effect immediately, It will be the only area without a pot limit, opening the door to a flood of vessels showing up with high amounts of pots. The last two years have seen participation of large out of state vessels that come and feast on a fishery we depend on to support our families and Alaskan way of life! This species has already taken a beating the last three years. Lets get this done today! 500 pot limit set for 2023.

Thanks you for your hard work!
