

PROPOSAL 299

5 AAC 31.XXX. New Section. and 5 AAC 55.055 - Prince William Sound Noncommercial Shrimp Fishery Management Plan.

Develop a Prince William Sound pot shrimp management plan, as follows:

Board action to compel the Department to develop a comprehensive PWS pot shrimp management plan in accordance with 5 AAC 39.200. For example, reference the SE Alaska pot shrimp management plan and the Regional Information report(1J06-08), both Department generated documents.

As a secondary measure, Consider reinstatement of 5 AAC 31.260 Prince William Sound commercial pot shrimp management plan to define management goals.

Implement a shrimp task force similar to the SE Alaska pot shrimp task force approved by the Board of Fish in 2003 (accepted in 2006 _RIR 1J06-08), which remains un-amended. The purpose of this panel would be to develop and maintain a comprehensive management plan. Having a comprehensive plan would lead to proactive management, in contrast to the current historical reporting method used for regulatory changes, which is reactive (managed by EO).

With a comprehensive Management plan, guidance to fishery managers will exist and can be in place before there is negative resource impact. This will limit the Emergency Order process, resulting in proactive, not a reactive, sustained yield management of PWS pot shrimp.

What is the issue you would like the board to address and why? Currently, there is no comprehensive Prince William Sound pot shrimp management plan. The intent of this proposal is to compel the Board of Fisheries and the department of fish and game to develop a Fishery Management Plan (FMP) as supported by regulation.

To date, The PWS pot shrimp fishery is managed and guided by the regulations cited above. These regulations are useful, but not refined enough, which results in management reliance on emergency orders to operate.

These regulations are vague in the context of a FMP and do not define the specific parameters needed to effectively support the Maximum Sustained Yield (MSY) of the resource.

The existing regulations fail to address concerns such as stock assessment, reporting measures, in-season management, conservation goals, and resource access that may not be appropriately weighted, specifically given the intent or involvement of particular user groups. The goal of a comprehensive plan would be to define a framework that outlasts management changes.

A consistent definition (plan) for conservation and MSY management of this precious resource is more than appropriate.

It is necessary to develop a standing body of regulation that considers all aspects of the PWS pot shrimp fishery, for all user groups, and provide guidance for ADF&G management into the future while prosecuting the fishery in perpetuity.

We Are Addressing the Board of Fish to direct the ADF&G to support achievement of the goal defined regulation as follows.

5 AAC 39.200 - Application of fishery management plans

(a) The Board of Fisheries has implemented by regulation fishery management plans that provide the Department of Fish and Game with guidelines to be followed when making management decisions regarding the state's subsistence, commercial, sport and personal use fisheries. The primary goal of these management plans is to protect the sustained yield of the state's fishery resources while at the same time providing an equitable distribution of the available harvest between various users. The regulations contained in this section are intended to aid in the achievement of that goal and therefore will apply to all fishery management plans contained in 5 AAC 03 - 5 AAC 39.

If a Fishery Management Plan is not considered, developed, and implemented for the harvest of PWS spot shrimp, the fishery will continue to be managed in a reactionary fashion, instead of being proactive for conservation and MSY goals. Continuing to operate the fishery in this way will prevent the progressive management of this stock.

Did you develop your proposal in coordination with others, or with your local Fish and Game Advisory Committee? Explain. This proposal was developed at length and with considerable input by fishery participants, The Valdez ADF&G Advisory Committee, The Whittier ADF&G Advisory Committee, the staff of the Department of Fish and Game, and ShrimpPros Association.

PROPOSED BY: PWS/Valdez and Whittier Advisory Committee
