Subject: Prop 90

Stop being pro outside big money interests. We need food security in Alaska. A 15 air mile restriction, a permitting process lab tests that dont exist for all the diseases puts an undue burden on Alaska residents. We are not just a park or game ranch for outside interests to hunt in. I've been here almost 40 years. I have seen what happens when the planes don't fly because of 100 degree below wind chills. If the Alaska highway is closed for some reason, the store shelves will go bare in less than 3 days. Then people will have to hunt the wildlife to the edge of extinction to feed their families. Telling me what I can and can't raise on my property is facism and no doubt outside interests telling Alaskans' what to do once again. We are not the lower 48's park or hunting preserve. People live and die here. They raise families that have to feed. I am sick and tired of outside interests telling us how to do it. I drink the milk my goats make, I make cheese, I am using the extra milk for raising pigs. I plan to use their coats to make cloth. We eat the meat of our butchered animals. I do not want to have to make a choice between following the law and feeding my family healthy food. My risk for heart disease has dramatically decreased because of what we eat and raise. I do not want to eat food lot protein. Linda J Knott Willow AK 99688
