<u>PROPOSAL 52</u> – 5 AAC 92.106. Intensive management of identified big game prey populations; 92.110. Control of predation by wolves; and 92.115. Control of predation by bears. Prohibit nonresident hunting of moose and caribou under intensive management until harvest and population objectives are met as follows:

Nonresident hunting shall not be allowed for any moose or caribou population under a current Intensive Management Predation Control Program until the minimum Intensive Management population or harvest objectives for that population has been reached.

What is the issue you would like the board to address and why? Nonresident hunting opportunity in areas under Intensive Management Predation Control Programs.

Intensive Management (IM) Predation Control Implementation Programs to restore the abundance of prey species as necessary to achieve human consumptive use goals are intended to benefit resident Alaskans.

Resident Hunters of Alaska supports IM efforts to achieve these goals.

We understand that nonresidents also benefit from IM programs once IM population or harvest objectives are met. That is why we support nonresidents as well as residents paying a fee for the state's active management programs. However, nonresidents are not supposed to benefit from IM programs while they are in progress when neither the harvest or population objectives for specific moose and caribou populations have been achieved.

We would like to see the Board of Game (board) adopt regulations that match the intent of our Intensive Management Law. No nonresident hunting should be allowed in any area of the state for a moose or caribou population that is under a formal IM Predation Control program to increase populations for the benefit of resident consumptive uses when the minimum IM population or harvest objectives for that prey species has not been reached.

This is a simple straightforward step the board can take to ensure for the public that when we undertake controversial predation control programs to reduce predators, its primary intention is to benefit resident Alaskans so that they can put food on their tables.
