

PROPOSAL 87 – 5 AAC 92.044. Permit for hunting bear with the use of bait or scent lures.
Prohibit the harvest of brown bears at black bear bait stations in Unit 16 as follows:

Unit 16 should be removed from the list of units that allow harvesting of brown bears at black bear bait stations.

What is the issue you would like the board to address and why? The current harvest of brown bears in Unit 16 is unsustainable. The Board of Game approved these levels of harvest to improve moose calf survival. Moose calf survival is between 35 and 45%. Brown bear harvest should be lowered to maintain or increase the bear population.
