

PROPOSAL 65

5 AAC 85.045. Hunting seasons and bag limits for moose.

Change the bag limit for moose in Units 7 and 15 from four to three brow tines as follows:

The simple fix here to bring into proper management of moose on the Kenai Peninsula is to allow for a harvest of 50-inch, three brow tine, spike regulations. The required online class to hunt on the Kenai should be modified to reflect these changes.

What is the issue you would like the board to address and why? Several years ago, the Board of Game changed the regulations to 50-inch, four brow tine, spike-only in most of Units 7 and 15. This has worked to increase the bull:cow ratio. We would like to see the legal bull regulation modified. The current bull:cow ratios are higher than optimal.

PROPOSED BY: Kenai/Soldotna Fish and Game Advisory Committee (EG-F18-050)
