

**PROPOSAL 88**

**5 AAC 92.530(6). Management areas.**

Move the boundary of the Skilak Loop Wildlife Management Area in Unit 15 as follows:

Simply move the boundary to the northern shoreline of the Kenai River. This would increase access for hunting and trapping. We believe the biggest benefit of this would go to waterfowl hunters. Currently there are no conservation concerns on hunting waterfowl.

**What is the issue you would like the board to address and why?** The current boundary of the Skilak Loop closure should be modified. The current boundary along the south shore of the Kenai River reduces opportunity.

**PROPOSED BY:** Kenai/Soldotna Fish and Game Advisory Committee (EG-F18-052)
