Create draw hunt for goats on the Cleveland Peninsula in Unit 1A and 1B

**Public Proposal** 

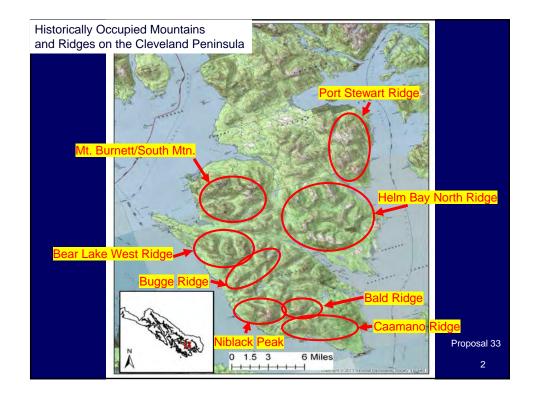

Department Recommendation:

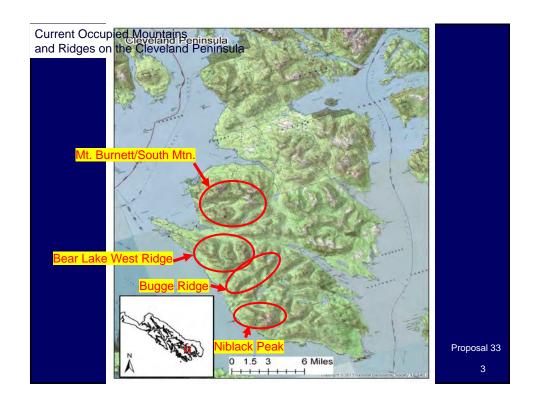

**Oppose** 

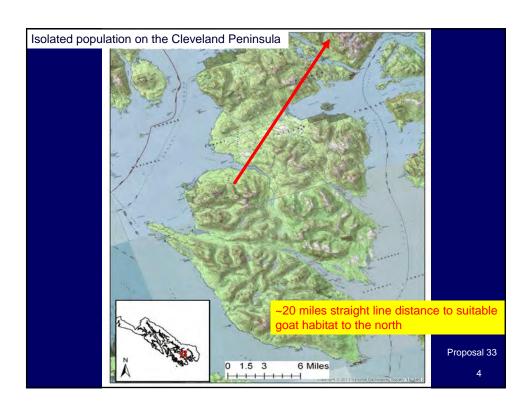

**AC Recommendation:** 

Ketchikan AC: Oppose

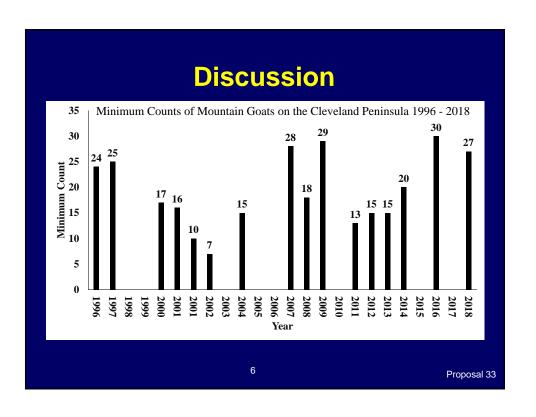

1

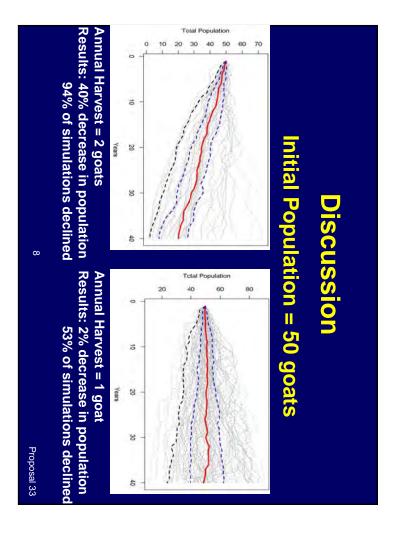

- Former regulation: 1949-2002 two goats
- Management strategy: 100 goats, 6 points total, nanny = 2 points, and billies =1 point
- 1996-2018: minimum counts of 7-30 goats
- Sightability correction for 2012-2014: 30-40 goats
- ADF&G best estimate 40-50 goats

- Research suggests no harvest for population <50 animals</li>
- Minimum of 100 goats to have hunting season
- Research suggests harvest of 1-4% of native population
- Since 1982, reduction from eight to four occupied mountains
- Research suggests only 1 immigrant every 10-15 years

Proposal 33

Proposal 33

#### **Proposal 34**

Create registration hunt for goats on the Cleveland Peninsula in Unit 1A and 1B

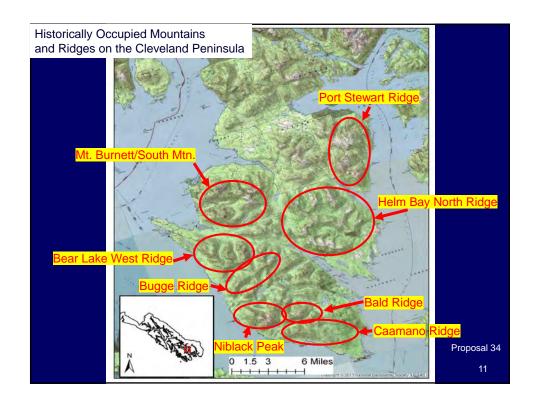

Public Proposal

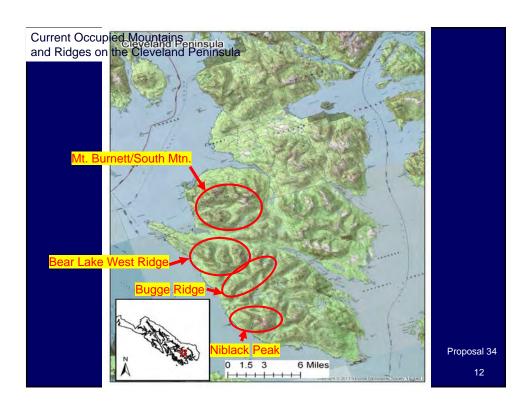

Department Recommendation:

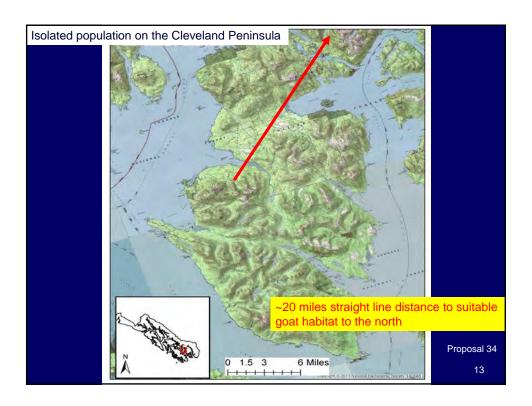

**Oppose** 

**AC Recommendation:** Ketchikan AC: Oppose

10

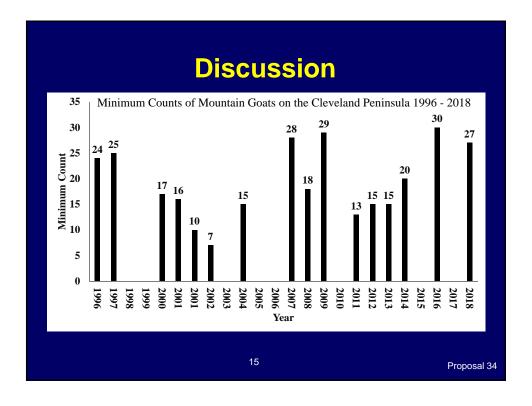

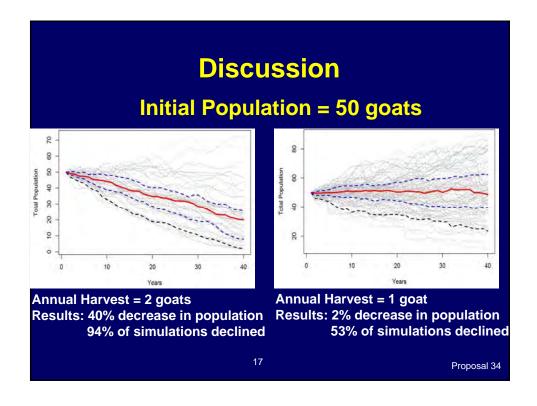

- Former regulation: 1949-2002 two goats
- Management strategy: 100 goats, 6 points total, nanny = 2 points, and billies = 1 point
- 1996-2018: minimum counts of 7-30 goats
- Sightability correction for 2012-2014: 30-40 goats
- ADF&G best estimate 35-50 goats

14

- Research suggests no harvest for population <50 animals</li>
- Minimum of 100 goats to have hunting season
- Research suggests harvest of 1-4% of native population
- Since 1982, reduction from nine to five occupied mountains
- Research suggests only 1 immigrant every 10-15 years

16

 Registration hunt gives less control over hunt

18

Create registration hunt for goats on the Cleveland Peninsula in Unit 1A and 1B Public Proposal

**Department Recommendation:** 

**Oppose** 

**AC Recommendation:** 

Ketchikan AC: Oppose

19

Proposal 34

#### **Proposal 35**

Eliminate the mountain goat draw hunt DG007, and add to registration hunt RG001. Increase draw tag allotment Department Proposal

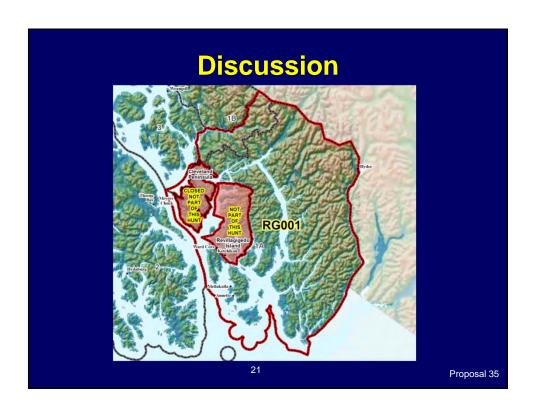

Department Recommendation:

**Neutral** 

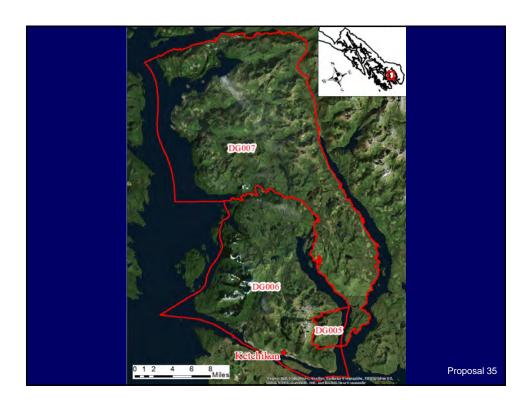

**AC** Recommendation:

Ketchikan AC: Support

20

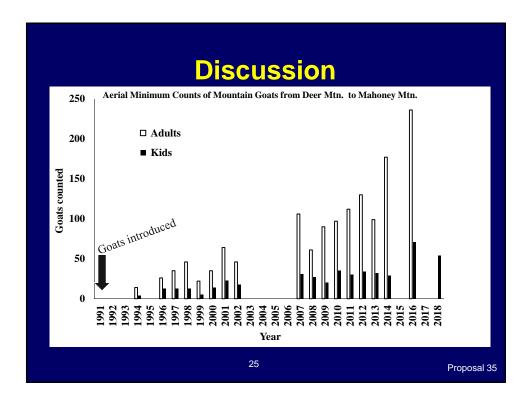

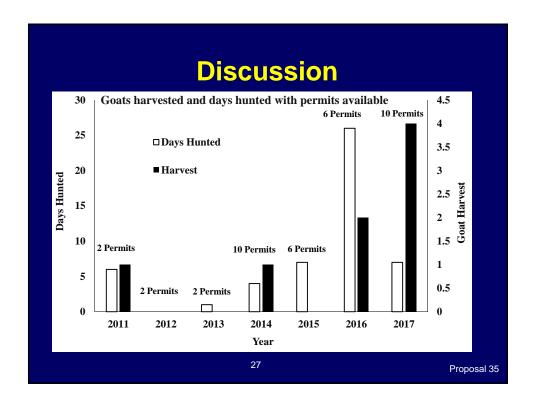

- Increase draw tag allotment from up to 25 permits per year to up to 50
- Remove DG007, integrate into RG001
- Introduced population high on Revilla
- Provide increase opportunity to popular mountain goat hunt with easy access

24

- DG007 hunt created in 2011
- Mean harvest <2 goats per season

26

- Access currently limited to boat and airplane
- Future road may provide limited access
- Provides more opportunity for goat hunting
- Relieve grazing pressure on wintering grounds

28

Eliminate the mountain goat draw hunt DG007, and add to registration hunt RG001. Increase draw tag allotment Department Proposal

Department Recommendation:

**Neutral** 

AC Recommendation: Ketchikan AC: Support

29

Proposal 35

#### **Proposal 36**

Change deer bag limit from two bucks to four bucks on the Cleveland Peninsula

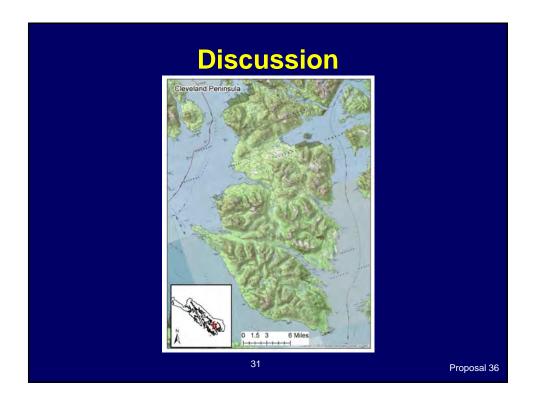

Public Proposal

Department Recommendation:

**Neutral** 

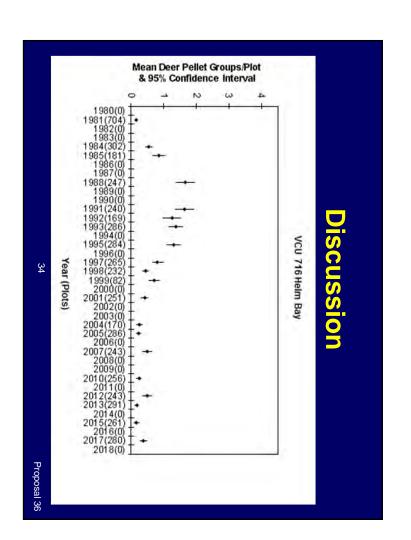

AC Recommendation: Ketchikan AC: Support

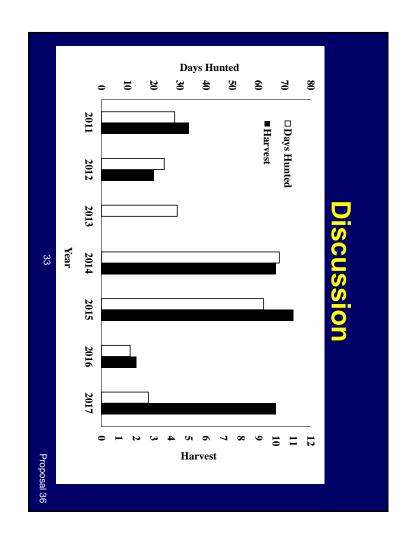

30

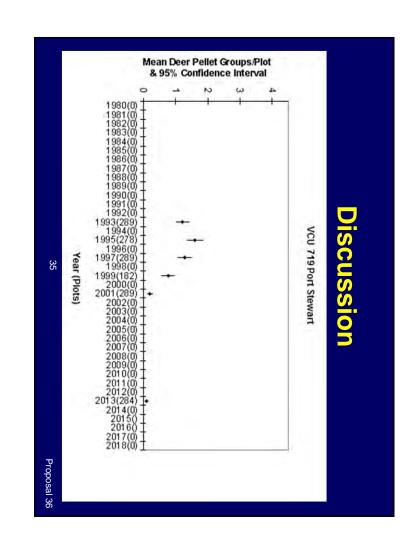

- Bag limit 4 deer until RY2009 season
- Bag limit currently 2 deer on Cleveland Peninsula

32

- Deer abundance remains low after hard winters from 1995-1998, 2006-2008, and 2011
- Snowfall higher on Cleveland
- Deep snow causes high deer mortality
- Wolf harvest low despite trapper effort

Change deer bag limit from two bucks to four bucks on the Cleveland Peninsula Public Proposal

Department Recommendation:

**Neutral** 

**AC Recommendation:** 

Ketchikan AC: Support

37

Proposal 36

#### **Proposal 37**

Reduce the harvest objective for deer in Unit 1A from 700 to 350-400

Department Proposal

**Department Recommendation:** 

**Neutral** 

**AC** Recommendation:

Ketchikan AC: Oppose

38

- Harvest objective based on mean harvest from 1994-1998 plus 10%.
- Current harvest objective has not been met for past 20 years (1998 – 2017)
- Changing habitat influencing deer carrying capacity

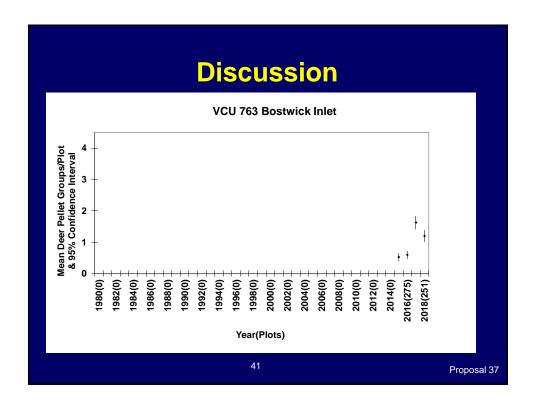

39

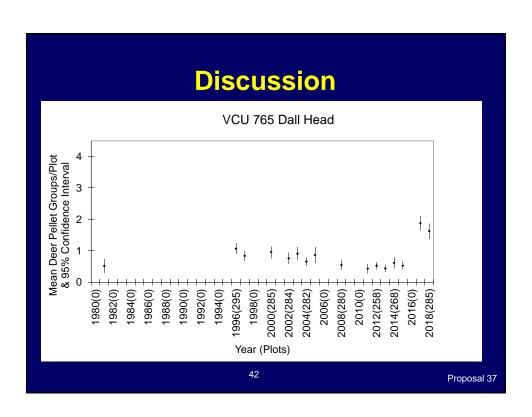

Proposal 37

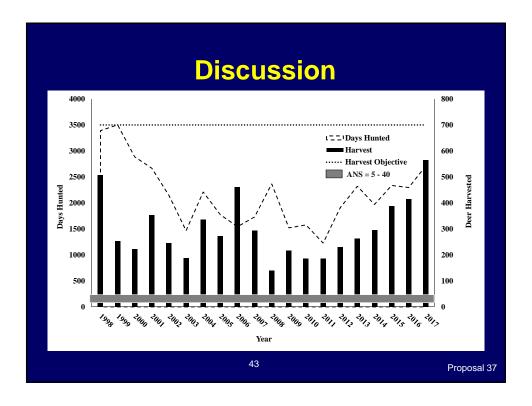

#### **Discussion**

Biogeographic Province	High-volume productive old growth <800 ft. elevation	Large-tree productive old growth <800 ft. elevation
North Misty Fjords	91%	85%
South Misty Fjords	98%	96%
Revilla Island/Cleveland Peninsula	81%	62%

40

- Mean harvest from 1998-2017 was 301 deer.
- No proven options for improving habitat.
- The Department does not believe the current harvest objective (700 deer) can be consistently met.
- From 1998-2017 harvest exceeded 350 deer six times.

44

Reduce the harvest objective for deer in Unit 1A from 700 to 350-400

**Department Proposal** 

**Department Recommendation:** 

**Neutral** 

**AC** Recommendation:

Ketchikan AC: Oppose

45

Proposal 37

#### **Proposal 38**

Extend the trapping season for beaver in Unit 1A

**Department Proposal** 

**Department Recommendation:** 

**Neutral** 

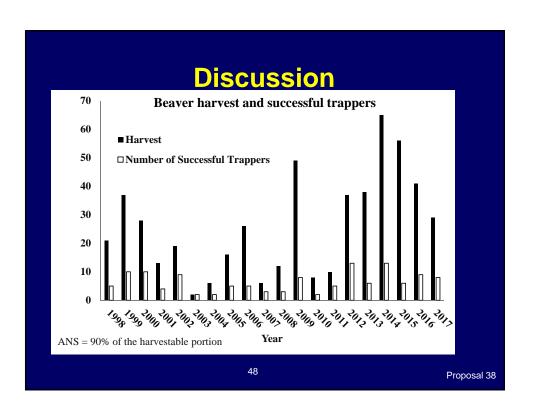

**AC** Recommendation:

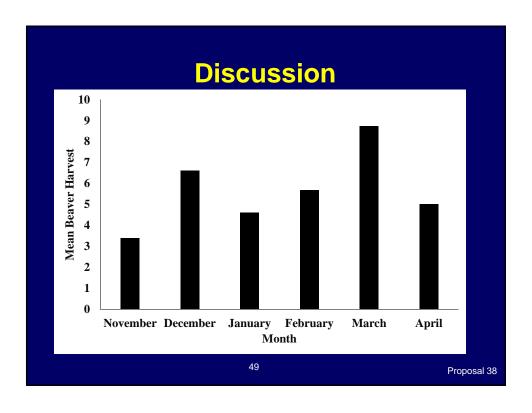

Ketchikan AC: Support

46

- Current trapping season: Nov. 1 April 30
- Proposed change: Nov. 1 May 15
- Estimated increase in harvest of two beaver annually
- This would misalign the trapping season in 1A from the rest of Region 1
- 1998-2017 mean harvest was 26 beavers

47

# Proposal 38 Extend the trapping season for beaver in Unit 1A Department Proposal Department Recommendation: Neutral AC Recommendation: Ketchikan AC: Support

Shorten the hunting season for deer in Unit 2

**Advisory Committee Proposal** 

**Department Recommendation:** 

**Neutral** 

**AC Recommendation:** 

Craig AC: Support Ketchikan AC: Oppose

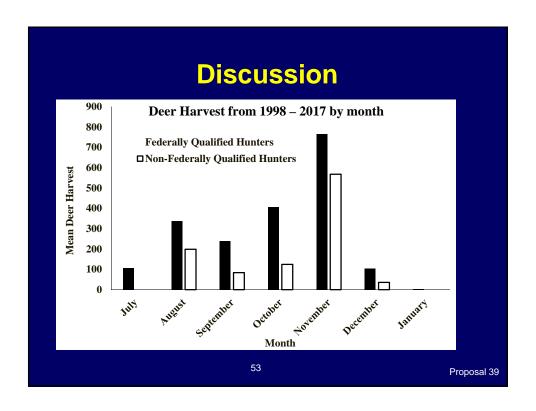

5

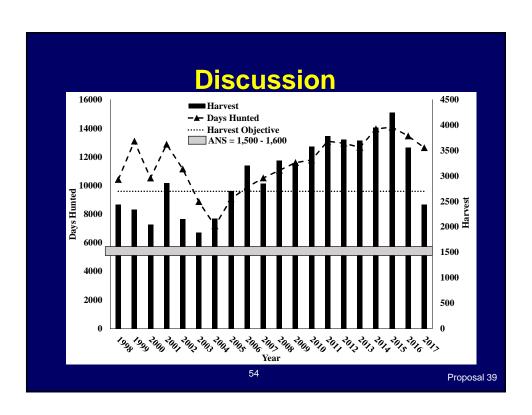

Proposal 39

#### **Discussion**

- Current regulations: four buck bag limit from Aug. 1 – Dec. 31.
- Proposed reduction: Aug. 1 Nov. 30.
- Primarily limits hunting opportunity for nonfederally qualified hunters.
- ~78% of land in Unit 2 is USFS, ~22% state and private.
- Mean harvest from 1998-2017 for nonfederally qualified hunters in December was 42 deer.

52

 Federal Subsistence Board reduced nonfederally qualified hunters bag limit in Unit 2 to two bucks.

55

Proposal 39

#### **Proposal 39**

Shorten the hunting season for deer in Unit 2

**Advisory Committee Proposal** 

**Department Recommendation:** 

**Neutral** 

**AC** Recommendation:

Craig AC: Support Ketchikan AC: Oppose

56

Reduce non-resident bag limit in Unit 2 to two deer

**Advisory Committee Proposal** 

**Department Recommendation:** 

**Neutral** 

**AC** Recommendation:

Craig AC: Support Ketchikan AC: Oppose

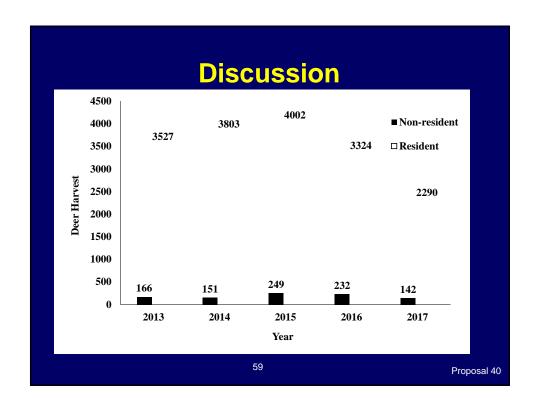

57

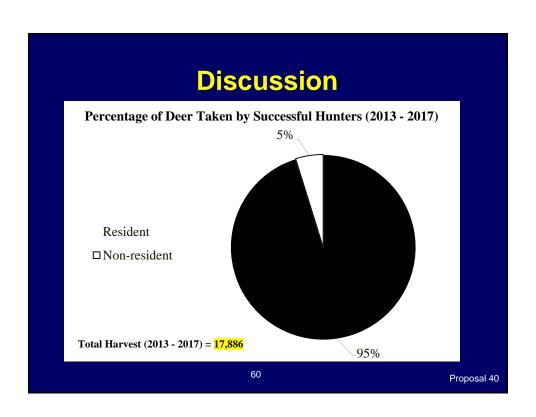

Proposal 40

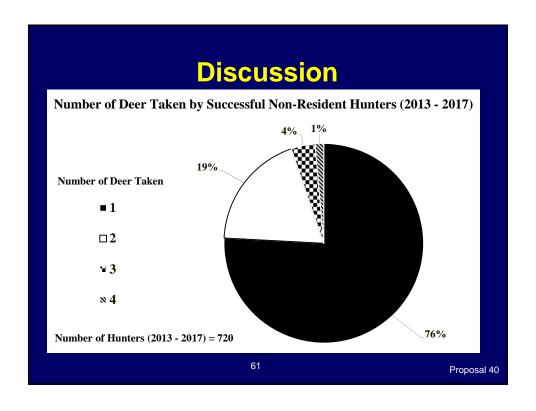

#### **Discussion**

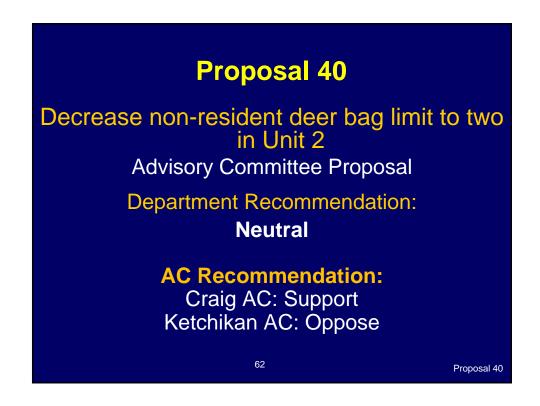

- Non-resident harvest is a small portion of overall harvest
- Mean annual harvest by non-residents is 9 deer on 3<sup>rd</sup> and 4<sup>th</sup> tags
- Increase in price of non-resident hunting license and locking tag for deer

58

Require attaching harvest ticket to deer in Unit 2

Craig Advisory Committee Proposal

Department Recommendation:

Neutral

**AC Recommendation:** 

Craig AC: Support Ketchikan AC: Oppose

63

Proposal 41

#### **Discussion**

- Craig AC indicated that harvest tickets are not being validated
- Prior radio-collar deer study indicated 67% (6/9 collared deer) deer were illegally harvested

64

- Paper tags may fall off of deer while in transit
- 2004 BOG meeting, similar proposal failed based on cost
- Alternative tag?

65

- Mean number of deer hunters from in Unit 2 was 3,937 from 2008-2017
- Assuming 5 tags per hunter at \$0.10 per tag
   = ~\$1,900/year

67

Proposal 41

#### **Proposal 41**

Require attaching harvest ticket to deer in Unit 2

Craig Advisory Committee Proposal

Department Recommendation:

**Neutral** 

**AC** Recommendation:

Craig AC: Support Ketchikan AC: Oppose

68

#### Change harvest guideline level for wolves for Unit 2

SE Alaska Subsistence Regional Advisory Council Proposal (Withdrawn)

**Department Recommendation:** 

**Neutral** 

#### **AC Recommendation:**

Craig AC: TNA Ketchikan AC: TNA

69

Proposal 42

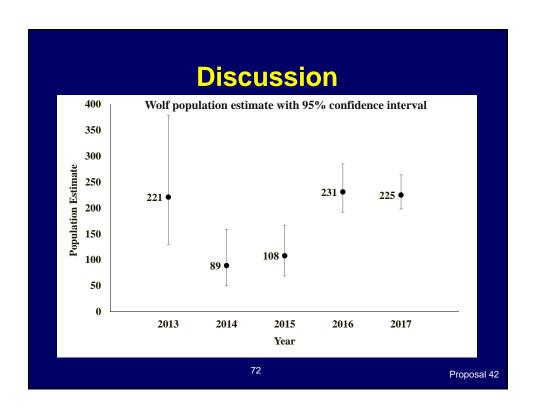

#### **Discussion**

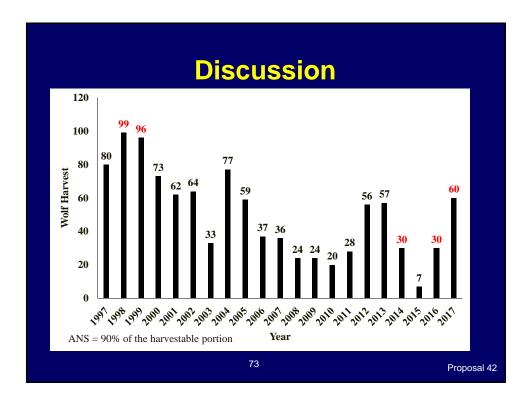

- This proposal would increase the Harvest Guideline Level (HGL) from 20% to 30% of the most recent population estimate
- The author of this proposal submitted a letter to the Board of Game to withdraw it in favor of Department proposal 43.

70

- Initial HGL adopted in 1997 for 25% of population annually
- Changed to 30% in 2001
- Lowered to 20% in 2015
- Reduced based on low wolf population estimate for Unit 2
- Population has recovered to current estimate of 225 wolves

71

- Unit 2 population varies more than others due to insular population
- Limited dispersal
- Road and beach access to wolves
- Federal seasons longer than State

74

#### Change wolf harvest guideline level for wolves for Unit 2

SE Alaska Subsistence Regional Advisory Council Proposal

**Department Recommendation:** 

**Neutral** 

#### **AC** Recommendation:

Craig AC: TNA Ketchikan AC: TNA

75

Proposal 42

#### **Proposal 43**

Manage Harvest of Unit 2 Wolves to Meet a Population Objective

**Department Proposal** 

**Department Recommendation:** 

Support

#### **AC** Recommendation:

Craig AC: Support Sitka AC: Support Ketchikan AC: Support Wrangell AC: Support East POW AC: Support

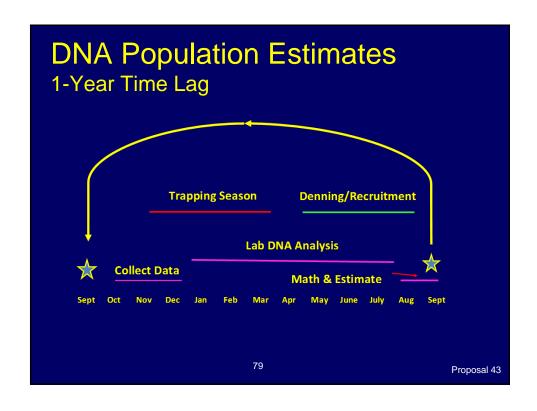

76

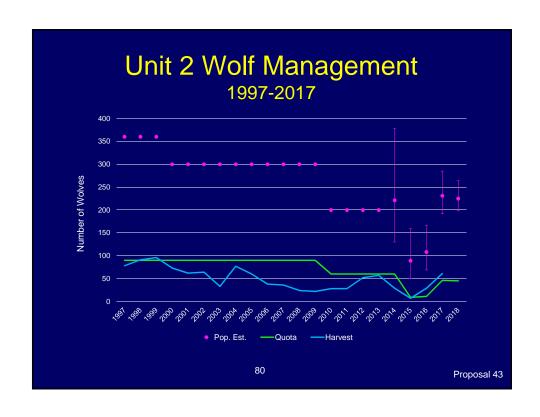

#### **Effect**

- This proposal would change the harvest management strategy for Unit 2 wolves.
- Current: Harvest guideline level (HGL) that is a percentage of the estimated population.
- Proposed: Manage harvest to maintain the population within an objective range.

77

#### **Current Management Strategy**

- Focuses only on the number of wolves to harvest. Quotas and EOs.
- No goal for the population.
- Leaves ADF&G to determine minimum size of the population.
  - Population size should be determined through a public process.

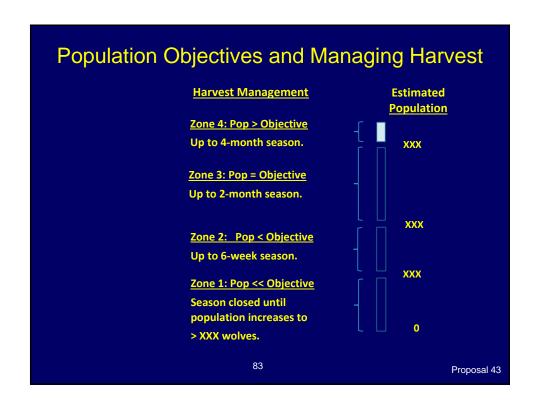

81

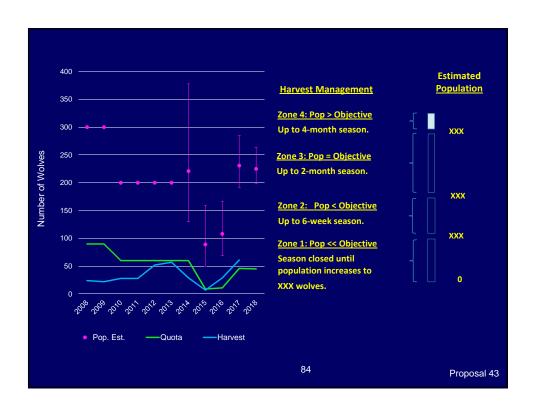

Proposal 43

### New Unit 2 Wolf Management Strategy

- Board establishes a population objective range.
- ADF&G will manage harvest to maintain population within that range.
- Harvest management decisions guided by a written management strategy.

82

Manage Harvest of Unit 2 Wolves to Meet a Population Objective

**Department Proposal** 

Department Recommendation: Support

#### **AC Recommendation:**

Craig AC: Support Sitka AC: Support Ketchikan AC: Support Wrangell AC: Support East POW AC: Support

85

Proposal 43

#### **Proposal 44**

Extend Unit 2 wolf trapping season Craig Advisory Committee Proposal

Department Recommendation:

**Neutral** 

#### **AC** Recommendation:

Craig AC: Support Ketchikan AC: Support

86

- Current wolf trapping season in Unit 2 Dec. 1 – Mar. 31
- Proposed extension of 2 weeks: Nov. 15 – Mar. 31

87

Proposal 44

#### **Discussion**

#### Pros

#### Cons

- Align Federal and State seasons
- Tide sets possible earlier

Reach quota faster

88
