

Caribou Photocensus

1. Photocensus requirements
2. Comparison of film and digital camera systems

Nathan Pamperin
2018 ADF&G Caribou Workshop
January 29, 2018

Submitted by ADF&G

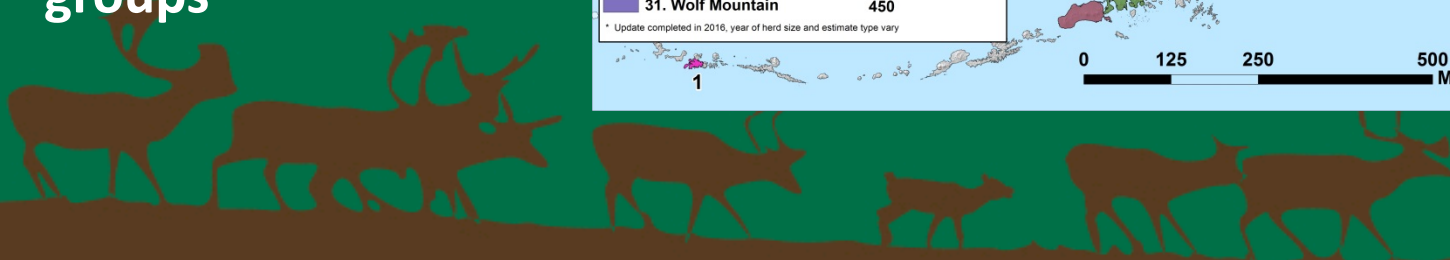

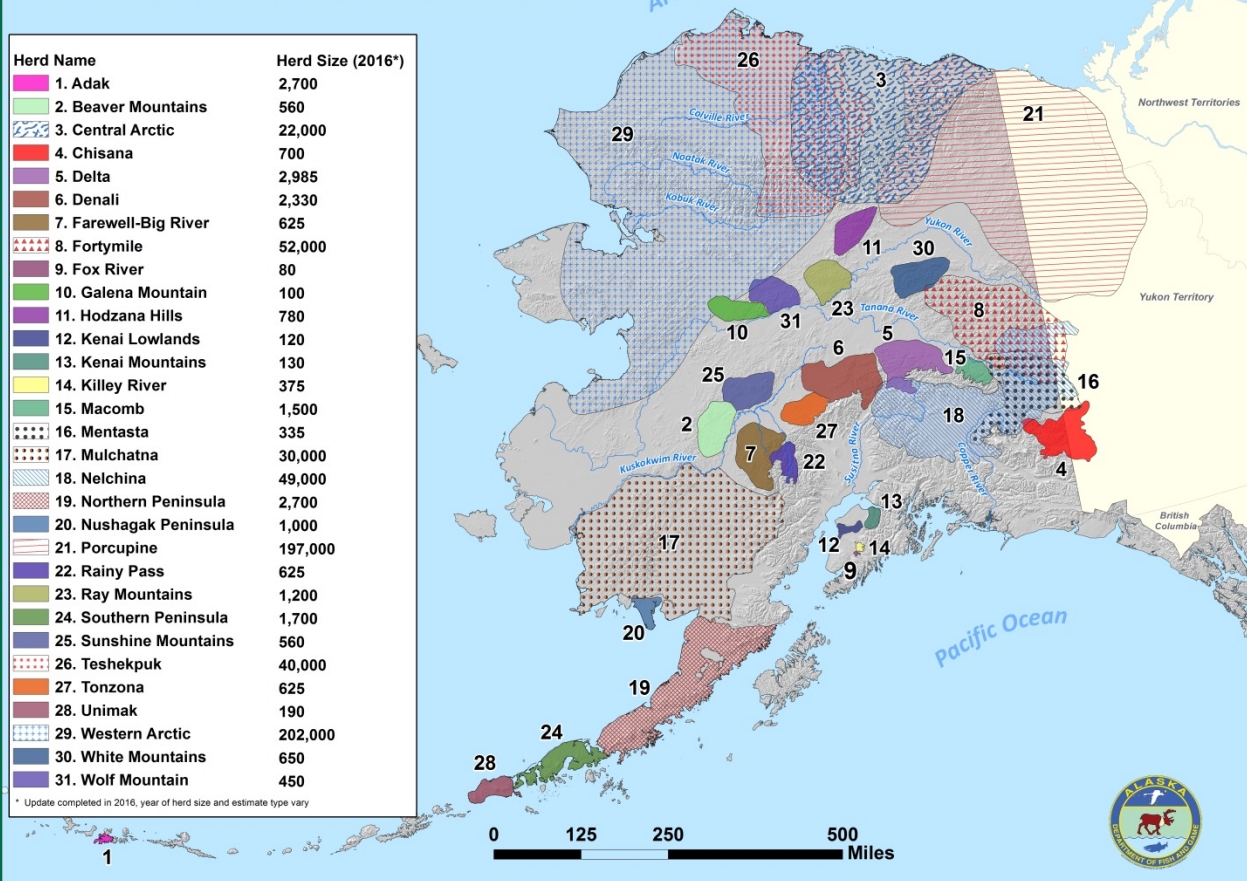

Caribou Photocensus

- 31 Caribou herds
650k – 1 mill. animals
- Largest herds
photocensused (~7)
~ 90% of total animals
- Annual harvest of
~20,000 caribou from
focus herds
- Take advantage of
post-calving
groups

Alaska Caribou Herds

Herd Name	Herd Size (2016*)
1. Adak	2,700
2. Beaver Mountains	560
3. Central Arctic	22,000
4. Chisana	700
5. Delta	2,985
6. Denali	2,330
7. Farewell-Big River	625
8. Fortymile	52,000
9. Fox River	80
10. Galena Mountain	100
11. Hodzana Hills	780
12. Kenai Lowlands	120
13. Kenai Mountains	130
14. Killey River	375
15. Macomb	1,500
16. Mentasta	335
17. Mulchatna	30,000
18. Nelchina	49,000
19. Northern Peninsula	2,700
20. Nushagak Peninsula	1,000
21. Porcupine	197,000
22. Rainy Pass	625
23. Ray Mountains	1,200
24. Southern Peninsula	1,700
25. Sunshine Mountains	560
26. Teshekpuk	40,000
27. Tonzona	625
28. Unimak	190
29. Western Arctic	202,000
30. White Mountains	650
31. Wolf Mountain	450

* Update completed in 2016, year of herd size and estimate type vary

Photocensus Requirements

- Weather/insect conditions for caribou to aggregate
- Groups need defined edges
- Favorable light conditions
- Radiotracking:
 - attempt to find all active collars
 - coordinated so photo plane can progress through groups
- Properly functioning equipment (plane, cameras, GPS, IMU, etc.)

Photocensus Challenges

- Main issues to overcome:
 - Location of photography unknown until last minute
 - flight planning on the fly
 - customized software to control cameras
 - Caribou move during photography
 - maximize swath
 - optimize overlap, minimize # of transects per group
 - need to be low enough to see caribou with naked eye

Photocensus Steps

**Radiotracking
Flights**

**Flying
Photo Mission**

**Develop
Imagery**

**Post Processing ,
Photo Layout**

**Counting
Photos**

Planes and Cameras

- Airplanes
 - Cessna 206 and DeHavilland Beaver
- Cameras
 - Black and white film cameras (old)
 - Digital cameras (new)
- Computer
 - Controls when cameras take pictures
 - Displays photo footprints in real time for adjusting overlap
 - Takes GPS location so we know where photos were taken

END-LAP

SIDE-LAP

**Photo footprint:
1,500ft x 1,500ft
(@1,000ft agl)**

Large group...

Photo Layouts

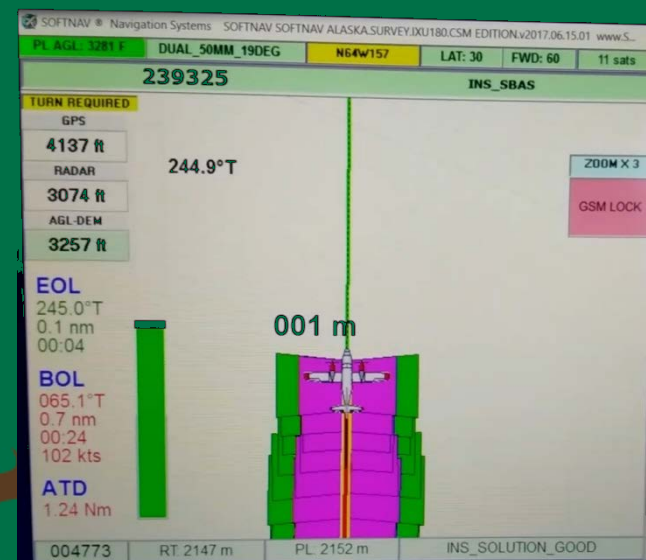

Counting

Digital Camera Systems

1. 3 cameras, each 100MP
2. Stabilized mount
3. GPS and IMU
4. Advanced flight management software
5. Software to stitch images together

Swath width

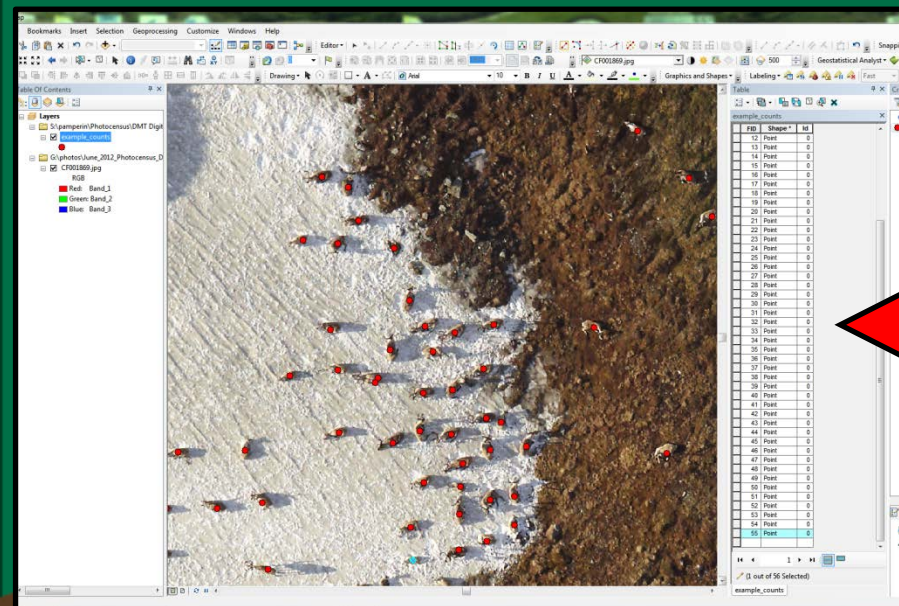

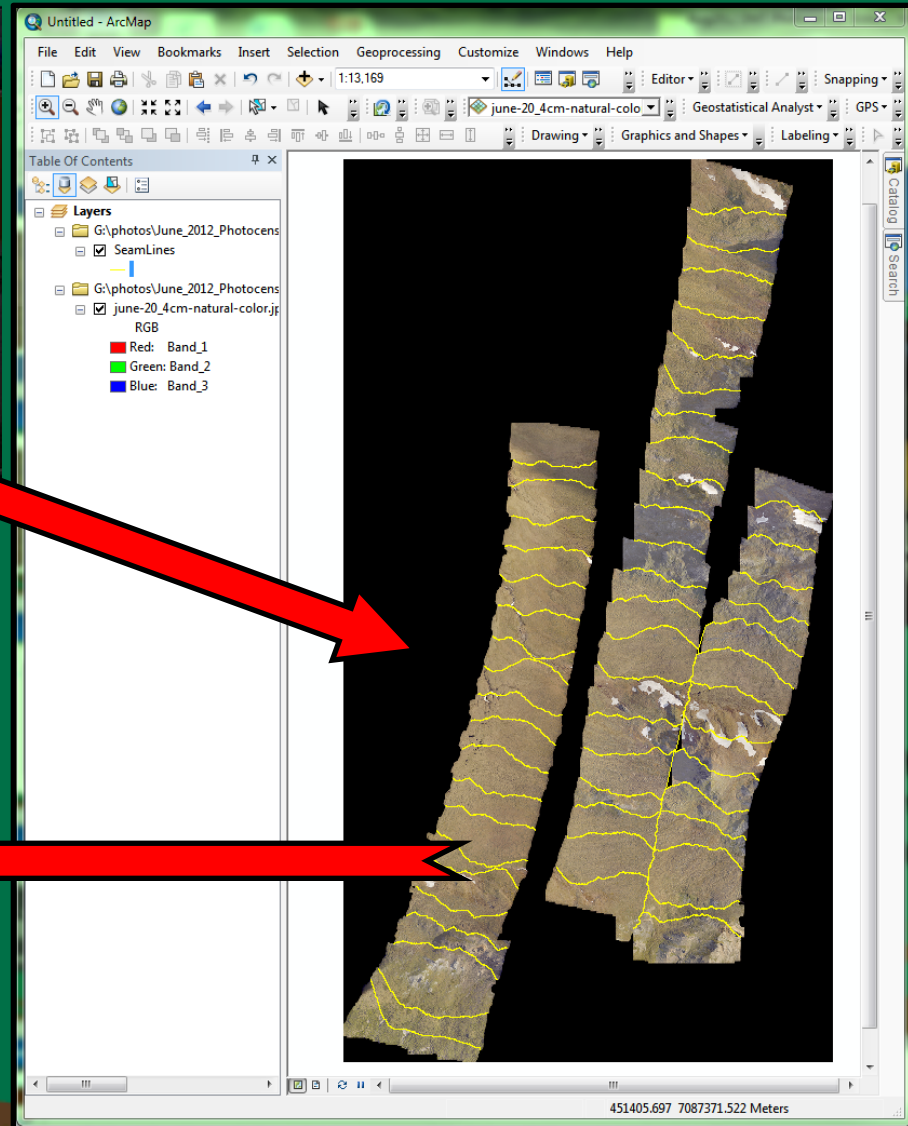

Dual 50mm Cameras	Swath	Ground Sample Distance (GSD) (image center, oblique)
1,500 feet AGL	3,700ft	4cm, 11cm
3,000 feet AGL	7,400ft	8cm, 22cm

Differences Between Film and Digital Counts

- **Image quality**
 - digital produces better images under poor light
 - easier to count calves on digital imagery
- **Group photography/layout**
 - less transects with digital system = less sidelap
 - 2017: only 8 of 116 groups with >1 transect
 - flight management more accurate with digital
- **Digital counting in GIS**
 - more accurate than grid overlay and film prints
- **Day to day differences in groups**
 - back to back censuses can vary
