

204	Close Unit 19c Dall Sheep harvest for five (5) years		
Opposed	0	13	<p>There is no reason to close a specific hunt unit down which would only increase pressure on other populations. Sheep across the state are down and closing one unit with no biological concern make no sense.</p> <p>no biological concern, natural cycle and this is going against Full Curl management plan. Also this is a specific unit and sheep across the entire state are in decline. Closing one unit will only increase hunting pressure by concentrating it on already depleted numbers.</p>
