

Members of the Board of Game

I request that you re consider the decision on Proposal 73. My primary concern behind this proposal is based on my understanding there are no conservation concerns from biologist supporting the reduced bag limit.

Normally I fully support managing non resident bag limits to ensure hunting opportunities for residents are secured for future generations, however with out scientific proof or reasoning, this proposal does not seem like a sound decision derived from facts.

Many resident hunters have friends and family visit Alaska annually to enjoy hunting trips to Kodiak, with this reduction it will not only discourage visitors it will also have an economic impact on residents and business on Kodiak.

I respectfully encourage you to please take a closer look at this proposal and decline the decision to reduce the non resident bag limit.

Thank you

Scott Breitsprecher
